

URBAN | PLATFORM FEATURES

What's new in the Urbans.

We completely redesigned the Urban. Almost every part is new, but the package looks quite the same. Don't let that fool you. This new light is completely waterproof, joining the Taz and the Gobe as the first fully submersible lights in the bike line. This Urban is rated for 1 meter underwater for 30 minutes. With the redesign, we improved thermal performance, allowing the light to go brighter longer, and created a far more robust electronic design where we have pushed efficiency into the low 90% range! Well beyond what we have done before.
